

Pro-Fit

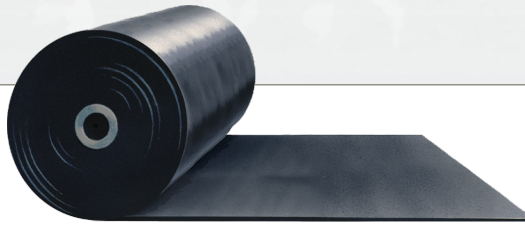

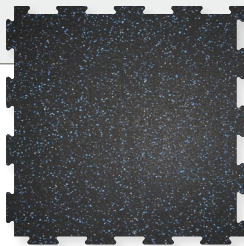

Athletic Rubber Flooring

Pro-Fit Athletic Rubber Flooring will stand up to the toughest use wherever a floor requires protection from impact and foot traffic.

Tiles or rolls

23 $\frac{3}{4}$ " x 23 $\frac{3}{4}$ " interlock tiles fit together with tight joints and lay flat for a seamless look. Perfect for loose-lay installations.

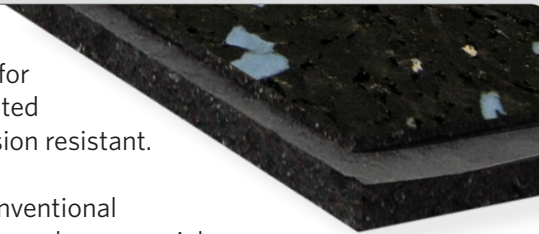

4' x 50' rolls install quickly in large spaces. Ideal for glue-down installations to inhibit odors and bacteria growth.

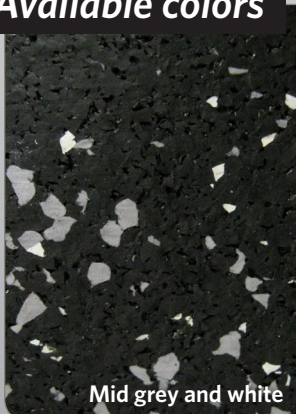

Single-layer or dual-layer

Single-layer Pro-Fit is the economical choice for residential and low-traffic areas. The granulated rubber cushions impacts and is cut and abrasion resistant.

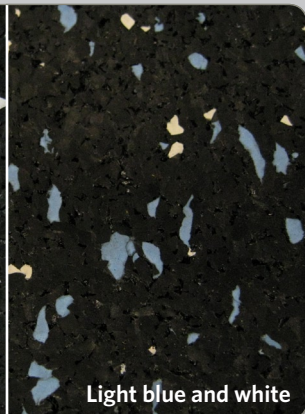

Dual-layer Pro-Fit is engineered to outlast conventional granulated sports floors. Made for heavy-duty and commercial applications. A fiber-reinforced masticated rubber layer is bonded underneath the granulated layer for excellent tensile strength and durability.

Available colors

Mid grey and white

Light blue and white

Pro-Fit Athletic Flooring is...

- Easy to clean
- Comfortable and abrasion-resistant
- Slip resistant when wet or dry
