

Solid Panel SPLASH GUARDS

New Solid Panel Splash Guards put your logo front and center, with the durability and strength you expect from Koneta's Nyracord fiber-reinforced rubber guards. Full thickness throughout equates to a thicker, stronger splash guard.

Our paints are engineered for vivid colors and intricate details without peeling or discoloration. Unlike embossed guards with their long lead times, Solid Panel Splash Guards are made to order right away, saving you time and money.

Designed to make an impression

- Two-part process forms a strong bond similar to an epoxy
- Thick, high-gloss finish, similar to vehicle paint surface
- Resistant to harsh weather, UV sunlight, ozone and chemicals
- Resists abrasion
- Full color palette to match your logo

DURABLE · ECONOMICAL
MADE IN NORTH AMERICA
